

19" HORIZONTAL RACK MOUNT 1U/2U CABLE MANAGEMENT 12 SLOT FINGER DUCT WITH COVER

DESCRIPTION

PH® Cable Management is a standard 19" 1U/2U rack mount panel that is commonly used for organizing cables and patch cords. The slot fingers allow the cables to enter and exit the finger duct flexibly, eliminates the cable stress, reduces the risk of disconnections, thus providing a neat, organized and clean appearance, and improve rack airflow.

The panel is constructed from black color plastic consisting of the 19" mounting hole duct and slot finger integrated to it plus external.

FEATURES

- Simple design for a variety of cables provide a flexible, effective and safe management of the cabling
- Standard 19" rack applications, with 12 slot fingers for flexible cable entry and exit and provide more space for proper cable routing and significantly reduce the cable stress in high density environments
- The slot fingers with adequate pass-through holes are designed to enable users to separate and organize cables effectively
- easily
- Front cover for additional protection of cables and improving the cosmetic outlook
- Plastic design provides a wide range of installation flexibility
- Light weight

APPLICATION

- 19" server racks and network cabinets
- Horizontal cable management for jumpers
- For network cabling to keep cables neat and tidy
