Boot

Description

Sumitomo modular plug boots are designed to help protect critical network connections during extreme use scenarios. The boot design can accommodate different cable jacket diameters up to 6.5mm.

Features

- Compliant with ISO/IEC 11801 2nd and TIA-568-C.2
- High quality strain relief boot for long-term network performance
- Slim body profile remove the congestion in data centre
- Snag-less version prevents tab breakage during moves, adds and changes among devices
- UL 157358 certificated
